Intenzita magnetického poľa v cievke

a) Cievka bez jadra

$$\circ \quad B_0 = \frac{N*I}{l}$$

ο N – počet závitov cievky

○ l – dĺžka cievky

b) Cievka s jadrom

$$\circ B = \mu * \frac{N*I}{I}$$

evka s jadrom
$$O B = \mu * \frac{N*I}{l}$$

$$O B = \mu_0 * \mu_r * \frac{N*I}{l}$$

$$O \frac{N*I}{l} = H$$

$$O B = \mu * H$$

$$\circ \quad \frac{N*I}{I} = H$$

 $\circ \quad \stackrel{\circ}{B} = \mu * H$

H - intenzita cievky $[A*m^{-1}]$
